SUMMARY

Senior Frontend Engineer with 9+ years of experience architecting scalable, high-performance web applications across fintech, edtech, and SaaS. Expertise in **React.js, TypeScript, Micro Frontend Architecture, Web Accessibility (a11y), and REST APIs**. Proven record of owning end-to-end feature delivery, driving architecture decisions, mentoring engineers, and leveraging AI-assisted workflows to maximise productivity.

WORK EXPERIENCE

Senior Frontend Engineer • Apollo.io • Remote, India

April 2025 – May 2026

- Single-handedly engineered the end-to-end UX for **AI Sequence Builder**, a core AI-powered feature on Apollo.io's sales engagement platform, driving measurable pipeline adoption.
- Tracked and improved feature adoption using **Amplitude Experiments** and custom analytics dashboards, enabling data-informed iterations and executive-level reporting.
- Adopted **Cursor AI and Claude Code** for AI-assisted development workflows; authored E2E and unit test coverage with **Vitest and Playwright** to reduce regression risk.

Tech: React.js, TypeScript, Redux, SCSS, REST APIs, Vitest, Playwright, Amplitude, Cursor AI, Claude Code, Git, CI/CD

Senior Software Engineer – Frontend • United Overseas Bank (UOB) • Singapore

July 2022 – April 2025

- Architected a **Micro Frontend Architecture using Webpack Module Federation**, enabling independent deployments across 3+ banking product teams and reducing inter-team release bottlenecks by ~20%.
- Built scalable, accessible transaction flow modules for cross-border fund transfers, meeting **WCAG 2.1 / a11y** and financial compliance standards across investment banking platforms.
- Partnered with backend and QA teams to integrate complex **REST APIs** into high-value banking workflows, ensuring reliability and correctness for critical financial operations.

Tech: React.js, Redux, TypeScript, SCSS, REST APIs, Webpack Module Federation, Web Accessibility (a11y), Git, CI/CD

Senior Software Engineer – Frontend • BYJU'S • Remote, India

December 2020 – July 2022

- Owned critical frontend features for BYJU'S live learning platform serving thousands of concurrent students as part of the Classes Growth team.
- Mentored junior engineers through code pairing and structured code reviews, raising team engineering standards and accelerating onboarding.
- Integrated **Agora RTC/RTM SDKs** to power real-time video and messaging in live classes, improving session reliability and student engagement.

Tech: React.js, JavaScript, SCSS, CSS-in-JS, Material UI, Agora RTC/RTM, REST APIs, Git, JIRA

Front End Engineer • ZOHO Corporation • Chennai, India

June 2017 – November 2020

- Designed and built an **Ember.js CI/CD tooling platform** automating build and deployment pipelines across multiple Zoho Finance production products.
- Developed a **Vue.js server performance monitoring client**, providing real-time infrastructure visibility via REST API integrations.

Tech: Ember.js, Vue.js, Node.js, JavaScript, ES6, SCSS, Tailwind CSS, REST APIs, Git, CI/CD
