SUMMARY

Senior Frontend Engineer with 9+ years of experience building scalable React and TypeScript applications across banking, SaaS, and edtech. Led **Micro Frontend Architecture on Webpack Module Federation** at UOB, cutting inter-team release bottlenecks by ~20%, and is now leading the micro frontend migration of a bank's internal credit card application portal. Owned Apollo.io's **AI Sequence Builder** end to end and created **lint-prepush** (2.5M+ npm downloads). Mentors engineers and applies AI-assisted development tools, including Devin AI, Cursor AI, and Claude Code.

WORK EXPERIENCE

Senior Frontend Engineer • OCBC Bank • Singapore

August 2026 – Present

- Leading the migration of a bank's internal credit card application processing portal to a **Micro Frontend Architecture using Webpack Module Federation**, with the goal of independently deployable modules.
- Driving frontend architecture and technical design decisions in **React.js and TypeScript**, including how the portal is divided into micro frontend modules.
- Using **Devin AI** to accelerate development and migration tasks while working with backend, QA, and product stakeholders.

Tech: React.js, TypeScript, JavaScript, CSS, Webpack Module Federation, Micro Frontends, Devin AI, Git, CI/CD

Senior Frontend Engineer • Apollo.io • Remote, India

April 2025 – May 2026

- Single-handedly engineered the end-to-end UX for **AI Sequence Builder**, a core AI-powered feature on Apollo.io's sales engagement platform, as part of the Core AI Apps team.
- Tracked feature adoption with **Amplitude Experiments** and analytics reports; contributed engineering feedback and UX improvements to quarterly planning and architecture reviews.
- Adopted **Cursor AI and Claude Code** for AI-assisted development; authored **Vitest and Playwright** unit and E2E tests to reduce regression risk.

Tech: React.js, TypeScript, Redux, SCSS, REST APIs, Vitest, Playwright, Amplitude, Cursor AI, Claude Code, Git, CI/CD

Senior Software Engineer – Frontend • United Overseas Bank (UOB) • Singapore

July 2022 – April 2025

- Led **Micro Frontend Architecture using Webpack Module Federation** for cross-border banking workflows, enabling independent deployments across 3+ product teams and **reducing inter-team release bottlenecks by ~20%**.
- Built scalable transaction flows and reusable frontend modules for investment banking platforms, including cross-border fund transfers.
- Collaborated with backend and QA teams to integrate **REST APIs** into high-value banking workflows.

Tech: React.js, Redux, TypeScript, SCSS, REST APIs, Webpack Module Federation, Git, CI/CD

Senior Software Engineer – Frontend • BYJU'S • Remote, India

December 2020 – July 2022

- Owned critical sprint deliverables for BYJU'S live class platform (thousands of students), delivering on time with minimal defects; integrated **Agora RTC/RTM SDKs** for real-time video and messaging.
- Mentored junior engineers through pair programming and design-pattern guidance; improved frontend performance and scalability.

Tech: React.js, JavaScript, SCSS, Material UI, Agora RTC/RTM, Git, JIRA

Front End Engineer • ZOHO Corporation • Chennai, India

June 2017 – November 2020

- Built an **Ember.js CI/CD tooling platform** for Zoho Finance products, plus build tools that enabled faster deployments.
- Developed a **Vue.js server performance monitoring client** and fixed production issues on Zoho Books.

Tech: Ember.js, Vue.js, Node.js, JavaScript, SCSS, Tailwind CSS, Git, CI/CD

PERSONAL PROJECTS

- **lint-prepush** – Node.js CLI that runs linters on committed branch files before push via Git hooks. **2.5M+ npm downloads.** [GitHub] [npm]
- **YouTabMan** – Chrome and Firefox extension to control all open YouTube tabs from one popup. **Top 5** in Mozilla Firefox Quantum Extensions Challenge 2018. [GitHub]
- **react-otpify** – Customizable, accessible React component library for OTP input handling. [GitHub] [npm]
